	Examiner A. Michael Chambers	Art Unit 3753	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This application has been examined. This application is a continuation of serial number 09/988,080 filed November 16, 2001, now US Patent 6,662,822 issued December 16, 2003. Two Information disclosure statements (IDS) filed October 17, 2003, and March 6, 2004. Claims 1-12 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 7-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hotchkin (Figure 5). Hotchkin shows a “one-way nut fastener comprising a nut body 11 having at least one lobe 16 that extends from a side wall and a flat portion 18. A through-hole 12 is shown. The “nut body” is turned by applying a rotational force. A curved portion is included on the lobes of the nut body. A plurality of lobes are shown in the Figures. The nut body acts as a cap for member 31.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art

Art Unit: 3753

to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

6. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hotchkin in view of Jacobson. Hotchkin discloses the claimed invention except for the recitation of the nut fastener being threaded as taught by Jacobson as shown in the threaded connection of drain member 12 to handle 18. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the nut fastener of Hotchkin to be threaded as taught by Jacobson, in order to be more easily retained on lag screw 25 of Hotchkin.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In particular note the patents to Mueller, Robinson and Ford.
